

New Way of Using Faculty PRO on Your Web Page

The old method of having to click "Display on web page" for each publication, presentation, et al. is gone.

Display on web page?

Now everything you might want to put on your web page is available to you on a single screen in PRO called the Web Profile screen.

HOW TO USE:

Type into the fields to edit your narratives for your biography, research interests, etc.

Select your publications, presentations, et al. from a drop-down list of the records you've created in PRO. Choose as many as you'd like. Records will print in your preferred citation style and in reverse chronological order.

Bio Academics Publications Presentations Contracts/Grants Awards/Honors

The fields on the screen now match the tabs on your web page, so you can see exactly where everything will show up as you work in PRO.
